The living room and kitchen are at the front of the home and you'll be surprised at how spacious they are. There are three bedrooms on the main floor and a four piece bath. The basement previously had two income suites which could be refinished for added revenue or could be developed for single family use as desired. Situated on a nice private lot with a detached garage which is a HUGE bonus at this price point. Shingles on the house were redone in recent years. Check this one out today and get it added to your portfolio.
